Contents

1 Installation

1.1 Creating the Ionic-App

First you have to install NodeJS. Then enter the `npm install -g ionic` command in the console to install Ionic. Finally, enter into the console `ionic start myApp tabs` to create a new Ionic app called myApp.

2 Testing the Installation

In the console, type `cd myApp` to get to the directory. Then enter `ionic serve --open`. Finally, the created Ionic App will be displayed in the web browser.
