Contents

1 Installation

1.1 Creating the Ionic-App

First you have to install NodeJS. Then enter the npm install -g ionic command in the console to install Ionic. Finally, enter into the console ionic start myApp tabs to create a new Ionic app called myApp.

2 Testing the Installation

In the console, type cd myApp to get to the directory. Then enter ionic serve –open. Finally, the created Ionic App will be displayed in the web browser.
